MARBLE MOSAIC

MARBLE MOSAIC

Marble mosaic is available in various shapes and colors and is supplied on mats. In addition to the standard mats, there are also different shapes / colors that you can add here. Some forms are supplied in its entirety, others you can create yourself by cutting the mats to size. We explain here how to process the flower in the famous "Flower Bottocino" mosaic.

FLOWER BOTTOCINO

1. Cut the flower shape out of the mat before you glue it. To do this, always take the 6 tiles at the bottom left, as in our example.
2. Before gluing carefully, count whether you have enough loose (colored) flowers to put back.
3. Glue the mats to the surface and immediately place the colored flower. This way you prevent height differences.

Tips:

- Place the loose (differently colored) flower in the mat as soon as you start gluing. Don't do this afterwards if the glue is dry due to height differences.
- Use the plain colored (cut out) stones as a fill for edges and corners.
- Do you want to create a logo or name in the mosaic? We are happy to help you. Ask our customer service for advice.
